INSTRUCTIONS FOR ORDERING EXTRAS.....	Page 1
INSTRUCTIONS FOR RETURNING GOODS.....	Page 2
TELEGRAPH CODE	Page 3
For the purpose of saving our customers expense in the ordering of repair parts by telegraph, there is given under this heading a brief general code of miscellaneous instructions for shipping, together with an example showing the use of the code.	
INDEX TO GROUPS.....	Page 4
CLASSIFIED LIST	Pages 5 to 30
In listing parts in this book, the purpose has been to simplify, as much as possible, the finding of any desired part. To accomplish this, we have listed parts in two different ways. The first, or classified list, has the parts arranged in groups according to their use or location on the "Caterpillar."	
NUMERICAL LIST	Pages 32 to 54
This list contains the same items that are given in the classified list, but in this case the items are arranged in numerical order; that is, according to the part numbers.	
When one desires to find the part that corresponds to any particular code word, this is the list to use, as in this list the Code Words are arranged alphabetically.	

INSTRUCTIONS FOR ORDERING EXTRAS.

1. Order all parts from the nearest Branch or Authorized Agent in your territory.

2. Observe carefully the Part Number and the letter on the part for which you want a duplicate. Be sure to state that Part Number and letter in your order, with the description following it, in the list of repairs.

In reading numbers, be sure that you are reading them right side up. Many numbers are capable of being read upside down, as 1166, 809 and 981.

3. State plainly your post office address (also freight station), county and state to which the goods are to be sent. State whether by parcel post or express (if express, by what company), or freight and by what route.

4. Always make out your order for Extras on a Separate Sheet, and not in the body of your letter, and on this sheet, give the way you want the material sent, by mail, what express company, freight by what railroad, and to what town.

5. There are several sizes of many parts, and it is necessary to show on your order the full dimensions and give a full description.

6. In ordering Extras, be careful to use the Part Names and Part Numbers in your order that are used in the following lists. When ordering by Telegraph Word or Code Word, be sure that each letter in the word is correct, as these words are very much alike and one letter wrong might make quite a difference in your order. When the Code Word alone is used and no quantity shown, it is understood that one only of each is wanted.

7. Prepay freight and express charges on sample castings or extras sent us and put your name on the back of the shipping tag.

8. No goods are shipped by us without the approval of our Credit Department. A customer whose financial standing is unknown to us and who desires to open up an account with us on a credit basis, should, with his first order, furnish us with satisfactory references.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

INSTRUCTIONS FOR RETURNING GOODS.

It sometimes becomes necessary for our customers to return sundry parts. In order to insure our giving proper credit for any such returns, it is essential that the following instructions be carefully observed:

1. Advise us in separate letter that you are returning goods to us, and why.
2. Give us the date of our invoice wherein we charged you with the goods.
3. Give us our order number covering the shipment to you.
4. Advise us the name of the carrier over which you are returning the goods to us.
5. Always prepay shipments.
6. Send shipping receipt, covering the return, with your letter.
7. Address each article plainly and put your name on the back of the shipping tag.

Note: In writing letters to us, endeavor to group your letter according to subjects. If you are sending us an order, have your letter refer only to the order. Do not advise us in letter appertaining to order that you are returning goods to us. Our business is grouped by Departments. The Order Department receives the orders, the Receiving Department receives notices of incoming shipments, the Accounting Department receives letters appertaining to collections and complaints. You can thus see the necessity of grouping your letter according to subjects.

TELEGRAPH CODE

For the convenience of our customers, to save expense and to expedite ordering, we have assigned a code word for each part of the "Caterpillar" Western Ten Ton. These Code Words consist of five letters each and can be joined together, making one word of ten letters, as illustrated below. Any customer who desires to have a single code word which may be used in place of the "Caterpillar" number in ordering extras, can obtain such code word by writing the Stockton office for it. We have also given a brief General Code for miscellaneous instructions, questions and answers relative to ordering and shipping parts wanted.

In telegraphing an order, start with the code, telling us how to ship, then use the word for the part wanted, stating the amount required, and then give the number of the Tractor.

The following is an illustration of a straight message and the corresponding Code message:
